Author Guidelines

Submit to the journal

Submissions should be sent via e-mail to: Professor Veselin Draskovic

E-mail: yesodraskovic@gmail.com

Review process

Each paper is reviewed by the editor and, if it is judged suitable for this publication, it is then sent to two referees for double blind peer review. The author's names are anonymous to the reviewers. Based on their recommendations, the editor then decides whether the paper should be accepted as is, revised or rejected.

The Editorial Board retains the right to methodologically adjust the article to the journal propositions and standards of the English language, as well as not to consider articles which do not meet the requirements of these guidelines.

Copyright

Articles submitted to the journal should not have been published before in their current or substantially similar form, or be under consideration for publication with another journal. Use this in conjunction with the points below about references, before submission i.e. always attribute clearly using either indented text or quote marks as well as making use of the preferred Harvard style of formatting. Authors submitting articles for publication warrant that the work is not an infringement of any existing copyright and will indemnify the publisher against any breach of such warranty.

The author is responsible for ensuring the authenticity of data, facts, quotations and other information. The Editorial Boards may publish articles for discussion, without necessarily sharing the author's views.

Manuscript requirements

Pictures, graphics and other attachments should be marked and sent as separate files, or in text, and must not exceed the journal format with margins.

Article Language

It is strongly recommended to send articles in the English language. Authors from Montenegro and surrounding countries should submit articles both in English and mother tongue due to the bilingual nature of the website.

- **Footnotes** - Footnotes should be used as least as possible, and only for the necessary explanations, with the continuous use of Arabic numbers.

References

SSCI recommends that self-citation for the best journals in the field goes around 10%. Accordingly we encourage authors to pay attention to this and cite their own works accordingly.

References are not to be numerated. It is to be arranged in alphabetic order of authors and chronologically for the articles of the same author. Literature is to be quoted according to the examples for books, magazines and other sources. References to other publications must be in *Harvard style* and carefully checked for completeness, accuracy and consistency. You should cite publications in the text: (Ilic, 2009) using the first named author's name or (Ilic and Tot, 2009) citing
